

Precision LogisticsSM: Comprehensive Solution, No Risk

Korindo Wind's proprietary comprehensive solution, Precision LogisticsSM, encompasses every detail from the moment we take your order until you accept your tower sections.

The Power of Precision

- Coordinating shipping – overseas and domestic (if desired)
- Ensuring compliance of sections with import laws or restrictions of the destination
- Researching the port to make sure it has the equipment, infrastructure and storage necessary to handle the sections
- Negotiating port fees
- Coordinating with port labor and ensuring workers have specific instructions for handling towers safely and efficiently
- Use of Korindo Wind's proprietary stacking frames
- Delivered Duty Paid (DDP) shipping
- Executing the proper bonds
- Paying duties and other customs charges
- Inspections at both ports; repairs of minor transit damage if necessary
- Coordinating port storage if necessary
- Reverse logistics of stacking frames

Korindo Wind is an ISO 14001 and ISO 9001:2000 certified manufacturer of high quality wind towers and monopiles with an 800-tower annual capacity. We have delivered more than 600 towers for U.S. projects and nearly 1,000 around the world. We consistently deliver the highest quality towers, and Korindo Wind has a perfect on-time delivery record.

Way More Than Towers

With Precision LogisticsSM you also gain maximum dependability with minimum cost through built-in cost efficiencies, scheduling confidence and overall simplification throughout the process.

Guaranteed On-Time Delivery

It costs us money to have a ship sitting in port waiting to be loaded, so whatever it takes to complete your towers on time, we'll get it done. And you'll know well in advance exactly when your sections will arrive.

Cost Certainty

We have negotiated a maximum rate with an overseas shipping partner, so you will know your maximum cost up front and well in advance, regardless of fluctuating fees in a volatile market.

Best Port Rates

Due to the volume of business we do with U.S. ports, we are able to negotiate the most competitive rate possible for your shipment.

Fewer Inland Costs & Hassles

All your towers will be delivered to the port closest to your project site so your inland logistics challenges, transport costs and state-by-state permitting issues will be minimized.

Batch Delivery

All of your tower sections will arrive at your site at the same time, ready to install. Your project manager can schedule cranes and other heavy equipment accordingly to save on rental fees and eliminate costly down time.

Delivery to Port or Site

In the United States, Korindo Wind has strong ties with a heavy haul partner so we can manage logistics from the port all the way to your project site.

One Plant, One QA Professional

Korindo Wind can cost-effectively deliver high quality sections anywhere in the world. If you are pursuing projects in multiple countries, you can place one quality assurance professional at our factory rather than many in the plants of multiple suppliers.

Let's Generate Some Power

Korindo Wind manufactures, delivers and supports wind towers with precision every step of the way, and we won't be satisfied until you are. To start your project with the precision of Korindo Wind, contact us today.
